

Instruction manual for wooden elements – borcas

Thank you for your trust and purchase of our products.

Production of our furniture is solely based on what the nature provides us with. The most essential material is high quality wood which is destined to serve you for years. We can also assure you that although the piece of furniture will grow older, it will not lose its unprecedented charm. Not only will it remain unique but also will develop the inimitable character on its own.

As a result of using exclusively natural products- namely wood- some minor differences in colour as well as structural and growth diversity can appear with the passing of time. These slight alterations, however, should not be perceived as defects. Each product signed by borcas is completely unique by its nature. You can be sure that another piece of furniture of this kind, is nowhere to be found.

What can be done to maintain the furniture in its superb condition to serve us or our future generations for centuries? We would like to familiarize you with the ways of professional as well as regular maintenance of our products:

As wood is a natural material, it breathes unceasingly and reacts to its surroundings, that is why it is vital for you to follow these tips below:

- keep it at the distance of at least 1m from the source of heat
- do not expose it to the long- term sunlight activity
- every piece of furniture should be well- levelled
- do not keep it in rooms where the temperature drops 10 degrees C below 0, or where the temperature exceeds 35 degrees C above zero
- humidity level should be kept at optimal level
- remove all the stains and smudges regularly

Every item made of natural material should also be well protected, that is why :

- do not put hot tableware directly on the surface of the tabletop
- do not spill water, do not clean it with water
- remove all the stains, smudges and liquids regularly
- use mouse or computer pads etc.

Clean it sensibly and safely, that is why:

- clean oiled or varnished wood with a soft cloth. Use products that are suitable for wood care. Before applying any cleaning agent on the surface of the furniture, check how it responds to the material. That is why it is recommended to put a sample of the agent on unseen part of the furniture.

We all want to live long lives, that is why:

- oiled and varnished surface should be cleaned with cleaning agents suitable for wood care
- if you would like to have your piece of furniture renovated, do not hesitate to contact us- we are happy and eager to help!
